

Automate Your Mission

Mission-aligned results. Built by insiders who understand the stakes.

Core Capabilities

CLOUD/DEV OPS

Infrastructure As Code (Ansible, Terraform, Cloudformation, ARM, CDM, CDK) » Cloud (AWS, Azure, Google, IBM, Oracle, Openstack) » Strategic ROI Analysis » Monitoring & Logging » DevSecOps » Continuous Delivery » Continuous Integration » Source Control (Github, Gitlab, Bitbucket) » Containerization » Development & Operational Orchestration » Infrastructure Deployment & Management » App Deployment & Scaling » Configuration Management » Test Automation

GEOSPATIAL DEVELOPMENT

Data Visualizations » Dashboards » Common Operating Picture Situational Awareness » Geospatial Application Developments » Modernizing Geospatial Applications » Multi-Sensor Processing: Vector, Raster, Photogrammetry, LIDAR, RADAR etc. » ESRI integration services » Geospatial Metadata » Hosting » Geospatial Web Services » Change Detection » Spatial Analysis » Geospatial Search

APPLICATION INTEGRATION & MACHINE LEARNING

Providing Mission Critical applications » Improved Decision Making through Generative AI & Application integration » GOTS & COTS application chaining with AI for total situational awareness » Machine Learning Integration providing accelerated response times » SAAS and Multi application workflow providing powerful integrated solutions » Data Science and Engineering » Database Architecture & Mining » Big Data & Data Lake Management » SQL, NoSQL, Graph » ETL » Business Intelligence » Data Security & Governance

USER EXPERIENCE (UX)

Creative Design » User-Centric Interface Design » User Research » Wireframes Information Architecture » Usability Testing » User Flows » Prototyping » Complex App Design (Legacy) » UX Metrics & KPI's » Front End Development Mobile First & Responsive Design » AI & LLM UX/UI Design » User-Centric Systems Mapping » Data Visualization & Interaction Design » Human Centered Systems Thinking

Highlights

- Founded by two former government civilians who shared a simple, but powerful belief — there had to be a better way
- Dedicated to building adaptable, automation-focused solutions grounded in real-world mission needs
